Index to Subjects—Volume 22, 1991

Current Microbiology

© Springer-Verlag New York Inc. 1991

AAC(3) gene, from *Acinetobacter baumannii*, cloning of, 259
AAD(2") gene, from *Acinetobacter baumannii*, cloning of, 259
Acidic mineral environment, acidophilic chemoorganotrophic bacterium from, 1
Acidobacterium capsulatum, bacterium from acidic mineral environment, 1
Acinetobacter baumannii, resistance to gentamicin and tobramycin in, 259
Agaricus bisporus, protoplast production and reversion by, 191
Alcaligenes xylosoxidans, in soil microcosm, survival of, 299
α-amylase, high-molecular-weight, cornstarch granule digestion by, 365
α-glucosidase
  from *B. subtilis* and *B. caldolyticus*, comparison of, 133
  from *B. subtilis* HTG transformant, purification and characterization of, 273
Aminoglycoside-modifying enzymes, role in resistance of *Acinetobacter baumannii* to gentamicin and tobramycin, 259
Anacystis nidulans, transformation of, 15
Anaerobic glycerol degradation, by a mixed microbiol culture, 47
Antibiotics, effect on microviscosity of mouse splenocyte cytoplasmic membrane, 195
Aromatic compounds, biodegradation of, by *Rhodopseudomonas gelatinosa*, 155
Aspartate, as energy source for *Fusobacterium nucleatum* subspecies and *Porphyromonas gingivalis*, 159
Azotobacter vinelandii, conjugal retrotransfer of chromosomal markers in, 241

Bacillus caldolyticus, purification, characterization, and comparison of α-glucosidase from, 133
Bacillus subtilis
  heat shock proteins induced in, 231
  purification, characterization, and comparison of α-glucosidase from, 133
Bacterial chemotaxis, rapid method for measurement of, 307
Bacteriophage lambda, shuttle vectors containing P_L promoter from, 15
Bacteriophage sensitivity, genetic diversity in isolates of *S. ruminantium* studied by, 279
Bacteroides cellulosolvens, cellulosome-like entities in, 27
Bacteroides ruminicola, in rabbit digestive tract, 21
Basidiomycetes, production and reversion of protoplasts from, 191
BCG vaccines, SEM study of mycobacterial developmental stages in, 247
Benzoic acid, biodegradation of, by *Rhodopseudomonas gelatinosa*, 155
Biotin, role in preparation of nonradioactive probe DNA, 79

Calcium carbonate, precipitation of, by *Deleya halophila*, 185
Calcium ions, role in protein phosphorylation in *Thiobacillus novellus*, 253
Calmodulin, role in protein phosphorylation in *Thiobacillus novellus*, 253
Campylobacter jejuni, genomic characterization of, 123
Candida albicans, study of in vitro adherence of, to radiopaque silicone compounds, 285
Capsules, effect on ability of cells to undergo lysis, 173
Carbon source utilization, effect on protein and cellulase secretion in *Neocallimastix frontalis*, 213
Cell energetic status, role in aerobic–anaerobic transitions of *E. coli*, 151
Cell growth media, effect on quinone composition of *M. varians* IAM 12146, 53
Cellulase secretion, in *Neocallimastix frontalis* EB188, 213
Cellulolytic microflora, in rabbits, establishment, counts, and identification of, 21
Cellulosome-like entities, in *Bacteroides cellulosolvens*, characteristics of, 27
Chitinase activity, in germinating cells of *Mucor rouxii*, 43
Chromobacterium violaceum, cloning and heterologous expression of violacein biosynthesis gene cluster from, 355
Chromosomal markers, retrotransfer of, 241
Cinnamic acid, biodegradation of, by *Rhodopseudomonas gelatinosa*, 155
Clostridium thermocellum, cellulolytic bacterium compared with, 27
Clostridium thermosulfurogenes, isolation of pullulanase gene from, 91
Collagen type I, expression of binding to *E. coli*, 97
Cornstarch granule digestion, by α-amylase secreted by *Lactobacillus amylovorus*, 365
Cosmid pDC100, role in transformation of mycobacterial species, 9
p-Coumaric acid, biodegradation of, by *Rhodopseudomonas gelatinosa*, 155
Crystal formation, calcium carbonate precipitation by *Deleya halophila* and, 185
Cyclic nucleotide, effect on protein and cellulase secretion in *Neocallimastix frontalis*, 213
Cysteine proteinase, microcyst formation and germination in *Polysphondylium pallidum* and changes in, 59
Cytochrome b_{556} species, expression in aerobically grown *E. coli*, 359

Deleya halophila
  calcium carbonate precipitation by strains of, 185
  DNA relatedness among strains of, 103
Demethylmenaquinone, *M. varians* IAM 12146 growth media and formation of, 53
Diaminopimelic acid, two strains of *Propionibacterium avidum* with different isomers of, 225
2,2-Dichloropropionate, *Alcaligenes xylosoxidans* degradation of, 299
Diethyl pyrocarbonate, effect on phosphate incorporation into glutamate dehydrogenase by, 181
Dimethyl sulfoxide (DMSO), reduction of, in *E. coli*, 109
DNA fingerprinting, genetic diversity in isolates of *S. ruminantium* studied by, 279
DNA probes
  comparison of nonradioactive and radioactive, 79
  specificity and sensitivity of methods for preparation and detection of, 79
  recovery from soil by extraction method, 345
DNA sequence similarity test, study of two strains of *Propionibacterium avidum* with, 225
DNA–DNA hybridization
  comparison of DNA probes for detection of target DNA by, 79
  DNA relatedness among *Deleya halophila* strains studied by, 103
  genetic diversity in isolates of *S. ruminantium* studied by, 279

Electron donors, role in dimethyl sulfoxide reduction in *E. coli*, 109

Endo-oligo 1,4-glucosidase activity, of *p*-nitrophenyl-α-D-maltoside hydrolyzing α-glucosidase, 133, 273
Enzyme synthesis, regulation of isocitrate lyase in *R. capsulatus* by, 73
Escherichia coli—Anacystis nidulans, plasmid shuttle vectors of, 15
Escherichia coli
cloning of pigment violacein into, 355
dimethyl sulfoxide reduction in, 109
expression of multiple cytochrome b_{556} species in, 359
expression of pullulanase gene in, 91
interrelations of energetic status, polyamine synthesis, and phospholipid metabolism in, 151
molecular cloning and gene expression in, 35
$NADP^+$-specific glutamate dehydrogenase from, 371
phosphorylation of $NADP^+$-specific glutamate dehydrogenase from, 181
properties of isocitrate lyase from, 65
strain K10, location of anaerobic respiratory enzyme TMAO in, 349
study of in vitro adherence of, to radiopaque silicone compounds, 285
thermotolerant nalidixic acid-resistant mutants of, 311
Escherichia coli strain NG7C, binding of proteins in, 97
Eubacterium cellulosolvens, in rabbit digestive tract, 21
Extracellular proteinase, from *Xanthomonas maltophilia*, isolation and characterization of, 85
Extraction method, recovery of bulk DNA from soil by, 345

Feed cellulose content, influence on fibrolytic microflora in rabbit digestive tract, 21
Fibrolytic microflora, in rabbit digestive tract, influence of feed cellulose content on, 21
Fibronectin, expression of binding to *E. coli*, 97
Field inversion gel electrophoresis, genomic characterization of *Campylobacter jejuni* by, 123
Fluorescamine labeling technique, study of utilization of amino acids and corresponding peptides as energy sources by, 159
Fusobacterium nucleatum subspecies, use of aspartate, glutamate, and peptides by, 159

Gel electrophoresis, study of heat shock proteins in *Bacillus subtilis* using, 231
Gene expression
in *E. coli*, of *Thiobacillus ferrooxidans* chromosomal ribulose bisphosphate carboxylate genes, 35
pullulanase gene in *E. coli*, 91
Genetically engineered microorganisms (GEMs), microcosm for measuring survival and conjugation of, 117
Genomic map, of *Campylobacter jejuni*, field inversion gel electrophoresis used for, 123
Gentamicin, resistance in *Acinetobacter baumannii* to, 259
Glutamate, as energy source for *Fusobacterium nucleatum* subspecies and *Porphyromonas gingivalis*, 159
Glutamate dehydrogenase
$NADP^+$-specific, from *E. coli*, 371
$NADP^+$-specific, phosphorylation of, 181
gly A gene, of *Campylobacter jejuni*, localization of, 123
Granaticin, production and synthesis of, by *Streptomyces thermoviolaceus*, 377
Gravitaxis, role in orientation of photosynthetic flagellate *Peridinium gatunense*, 165

Haemophilus influenzae, lysogeny in encapsulated and nontypable strains of, 173
Halidohydrolase gene, of *Alcaligenes xylosoxidans*, horizontal transfer of, 299
Heat shock proteins, induction in *Bacillus subtilis*, 231
Host-vector systems, for thermotolerant methanol-utilizing bacteria *Methylophilus* spp. KISRI strains, 199
Humoral immunity, in lower respiratory tract, local immunization and induction of, 265
p-Hydroxybenzoic acid, biodegradation of, by *Rhodopseudomonas gelatinosa*, 155
2-Hydroxybiphenyl, effect of sulfate-reducing conditions on metabolism of, 69

IncP plasmids, role in retrotransfer of chromosomal markers in *Azotobacter vinelandii*, 241
Interleukin 1, *Legionella pneumophila*-induced secretion of, 143
Intranasal immunization, effect on challenge with *Pseudomonas aeruginosa*, 265
Isocitrate lyase
from *E. coli*, properties of, 65
in *Rhodobacter capsulatus*, regulation of, 73

KISRI, thermotolerant, restricted facultative methanol-utilizing bacteria, host-vector systems for, 199

Lactobacillus amylovorus, cornstarch granule digestion by α-amylase secreted by, 365
Lactobacillus fermentum ATCC14931, purification of L-serine dehydratase from, 205
Laminin, expression of binding to *E. coli*, 97
Legionella pneumophila, secretion of interleukin 1 induced by, 143
leu-500 promoter mutant, expression of leucine operon carrying, 293
Leucine operon, effect of aerobic and anaerobic conditions on expression of, 293

MAL-constitutive gene, in *Saccharomyces cerevisiae*, fructooligosaccharide fermentability and discrimination of, 237
Membrane protein, role in metabolism inhibition, 221
Menaquinone
acidophilic chemoorganotrophic bacterium containing, 1
M. varians IAM 12146 growth media and formation of, 53
role in DMSO reduction in *E. coli*, 109
Metabolism inhibition, result of interaction between antibody to and membrane protein of *Mycoplasma bovoculi*, 221
Methylotrophic bacteria, uptake of shuttle plasmid vectors by, 199
Microassay, for testing potential agents for control of tobacco infection, 317
Micrococcus varians IAM 12146, formation of quinones depending on cell growth media of, 53
Microcosm
survial and conjugation of genetically engineered microorganisms measured by, 117
survival of *Alcaligenes xylosoxidans* in, 299
Microcysts, cysteine proteinase changes during formation and germination of, 59
Microviscosity, of cytoplasmic membrane, effect of antibiotics on, 195
Molecular cloning, in *E. coli*, of *Thiobacillus ferrooxidans* chromosomal ribulose bisphosphate carboxylate genes, 35
Monoclonal antibody, murine, identification of yeast genus *Schizosaccharomyces* by, 339

Monoclonal antibody-based immunoassay, genetic diversity in isolates of *S. ruminantium* studied by, 279
Mucor racemosus, regulation of macromolecular synthesis during nutritional shift-up in, 321
Mucor rouxii, chitinolytic activity in germinating cells of, 43
Murine macrophages, responses of, to *Legionella pneumophila*-induced interleukin 1, 143
Mycobacterial developmental stages, in BCG vaccines, SEM study of, 247
Mycobacterial lysis, new method for, 327
Mycobacterium, transformation of, by shuttle vectors from pAL5000 plasmid, 9
Mycoplasma bovoculi, metabolism inhibition as result of interaction of membrane protein of and antibody to, 221

$NADP^+$-specific glutamate dehydrogenase, purification and characterization of, 371
Nalidixic acid, effect on *Pseudomonas cepacia* plate mating, 117
Nick translation, role in labeling nonradioactive DNA probes, 79
p-Nitrophenyl-α-D-maltoside, α-glucosidase hydrolysis of, 133
Nutritional shift-up, in fungus *Mucor*, regulation of macromolecular synthesis during, 321

Oxoacid inactivation, regulation of isocitrate lyase in *R. capsulatus* by, 73

Peptide microsequencing, study of heat shock proteins in *Bacillus subtilis* using, 231
Peptides, an energy source for *Fusobacterium nucleatum* subspecies and *Porphyromonas gingivalis*, 159
Peridinium gatunense, effect of hypergravity on orientation of, 165
Phages, mitomycin C-induced release of, from *Haemophilus influenzae*, 173
Phospholipid metabolism, role in aerobic–anaerobic transitions of *E. coli*, 151
Phosphorylation, ATP-dependent, of glutamate dehydrogenase from *E. coli*, 181
Phytophthora parasitica var. *nicotianae*, control of infection of tobacco by, 317
Plasmid analysis, genetic diversity in isolates of *S. ruminantium* studied by, 279
Plasmid pAL5000, transformation of mycobacterial species by shuttle vectors from, 9
Plasmids, role in foreign gene expression in *Anacystis nidulans*, 15
Plate mating, transconjugant formation by, 117
Polarization fluorescence, of 1,6-diphenyl-1,3,5-hexatriene, in mouse splenic membrane, 195
Polyamine synthesis, role in aerobic–anaerobic transitions of *E. coli*, 151
Polysphondylium pallidum, cysteine proteinase changes during microcyst formation in, 59
Porphyromonas gingivalis, use of aspartate, glutamate, and peptides by, 159
1,3-Propanediol, role of sulfate reduction and methanogenesis on degradation of, 47
Propionibacterium avidum, two strains with different isomers of diaminopimelic acid, 225
Protease activity, in antibiotic-producing *Streptomyces thermoviolaceus*, 377
Protein inhibitors, effect on protein and cellulase secretion in *Neocallimastix frontalis*, 213
Protein phosphorylation, in facultative chemolithotroph *Thiobacillus novellus*, 253
Protein secretion, in *Neocallimastix frontalis* EB188, 213
Protein synthesis
  during nutritional shift-up in *Mucor racemosus*, 321
  in cell-free extracts prepared from thermotolerant mutant and parent, 311
Protoplasts, of *Agaricus bisporus*, production and regeneration of, 191
Pseudomonas aeruginosa
  local immunization with temperature-sensitive mutant of, 265
  study of in vitro adherence of, to radiopaque silicone compounds, 285
Pseudomonas cepacia, spontaneous temperature-sensitive mutants of, 129
Pullulanase gene
  expression in *E. coli*, 91
  isolation from *Clostridium thermosulfurogenes*, 91
Pulsed-field gel electrophoresis, new method of mycobacterial lysis for, 327
Pyruvate, effect on isocitrate lyase activation in *R. capsulatus*, 73

Rabbits, fibrolytic microflora in digestive tract of, 21
Radiopaque silicone compounds, in vitro bacterial adherence reduced by, 285
Reduced minus oxidized spectrum, of cytochrome b_{556} species in *E. coli*, 359
Restriction enzymes, digestion of DNA by, 345
Retrotransfer of chromosomal markers in *Azotobacter vinelandii*, 241
Rhizosphere, survival and conjugation of genetically engineered microorganisms in, 117
Rhodobacter capsulatus, regulation of isocitrate lyase in, 73
Rhodopseudomonas gelatinosa, biodegradation of aromatic compounds by, 155
Ribosomal RNA, of *Campylobacter jejuni*, localization of, 123
RNA synthesis, during nutritional shift-up in *Mucor racemosus*, 321
RuBPCase genes, of *Thiobacillus ferrooxidans*, molecular cloning and expression of, 35

Saccharomyces cerevisiae
  discrimination of *SUC* and *MAL*-constitutive genes in, 237
  fermentability of fructooligosaccharide in, 237
Salmonella typhimurium, anaerobic cultivation of *leu-500* auxotrophic mutant of, 293
Scanning electron microscopy, study of mycobacterial developmental stages in BCG vaccines by, 247
Schizosaccharomyces, murine monoclonal antibody used in identification of, 339
Selenomonas ruminantium, genetic diversity in ruminal isolates of, 279
L-Serine dehydratase, from *Lactobacillus* fermentum ATCC14931, purification of, 205
Serotyping scheme, for *Vibrio fluvialis* and *V. furnissii*, 335
Shuttle vectors
  constructed from plasmids from *Methylophilus* spp. KISRI strains and *E. coli*, 199
  construction of, 15
  from pAL5000 plasmid, transformation of mycobacterial species by, 9
  role in transformation of *Anacystis nidulans*, 15
Staphylococcus aureus, study of in vitro adherence of, to radiopaque silicone compounds, 285
Staphylococcus epidermidis, study of in vitro adherence of, to radiopaque silicone compounds, 285

Streptomyces thermoviolaceus, protease activity and antibiotic production in, 377
SUC gene, in *Saccharomyces cerevisiae*, fructooligosaccharide fermentability and discrimination of, 237
Sulfate reduction, effect on metabolism of ground water contaminant 2-hydroxybiphenyl, 69
Sulfate reduction, role in 1,3-propanediol degradation, 47

Tantalum, reduced bacterial adherence to silicone materials with additive, 285
Temperature, effect on protease production and antibiotic synthesis in *Streptomyces thermoviolaceus*, 377
Temperature-sensitive mutants
  humoral immunity induced in lower respiratory tract by, 265
  of *Pseudomonas cepacia*, 129
Thermostability
  study of α-glucosidase from *B. subtilis* HTG transformant with respect to, 273
  study of α-glucosidase from *B. subtilis* and *B. caldolyticus* with respect to, 133
Thermotolerant mutant, of *E. coli*, isolation and mapping of, 311
Thiobacillus ferroxidans, cloning and expression of chromosomal ribulose bisphosphate carboxylase genes of, 35
Thiobacillus novellus, protein phosphorylation in, 253
Tobacco, control of infection of by *Phytophthora parasitica* var. *nicotianae*, 317
Tobramycin, resistance in *Acinetobacter baumannii* to, 259
Transconjugants, *Pseudomonas cepacia* mating resulting in, 117
Trimethylamine N-oxide reductase, location in cytoplasmic membrane of *E. coli*, 349

Vibrio fluvialis, serotyping scheme for, 335
Vibrio furnissii, serotyping scheme for, 335
Violacein, cloning of gene cluster encoding biosynthesis pathway for, 355
Vitronectin, expression of binding to *E. coli*, 97

Xanthomonas maltophilia, extracellular proteinase from soil strain of, 85

Yeast extract, effect on isocitrate lyase activation in *R. capsulatus*, 73
